

**Prime Minister
Viktor Orban**

**Vice Prime Minister
Dr Zsolt Semjén**

All members of the Hungarian Government

All members of the Hungarian Parliament

This is an open letter, addressed to the government and all 199 politicians in the Hungarian Parliament. The signatories are Swedish citizens who are writing this appeal to you who will soon decide whether Sweden should join NATO or not! We know that we have a majority of the Swedish people behind us, in this letter!

Sweden has been free from war for 210 years, thanks to our choice to be a neutral nation. That Sweden has now applied for membership in NATO has not happened at the request or wish of the Swedish people, on the contrary, a large majority of the Swedish people do not want Sweden to be a member of NATO. Sweden's NATO application has not been done democratically, the Swedish people have not been allowed to participate, no debates have taken place and the media has not allowed the public to publicly express their opinion on this matter.

The United States (NATO) has used Ukraine as a war zone to try to destroy Russia, which everyone with insight has understood is an impossibility (especially American military strategists have constantly pointed to Russia's superior strength in terms of war). Now parts of Ukraine are a destroyed nation, bombed infrastructure, hundreds of thousands of sacrificed lives to no avail, an impoverished war organization, etc. Is that why the US now wants Sweden as a target in the next stage of the war against Russia? There is reason for the public to believe so!

A near future including a military build-up on Swedish territory with NATO weapons, ammunition and vehicles can only mean a rearmament for a future war. In plain language, Swedish military and politicians proclaim that the enemy is Russia, of course Russia sees an armament on Swedish soil as a threat!

The US and Sweden's government have also signed an agreement, a so-called Defense Cooperation Agreement, DCA, which gives the US military access to Sweden's territories, access and use of 17 Swedish secret defense facilities, permission to deploy US soldiers on Swedish soil, to store vehicles, machines, ammunition and weapons (including nuclear weapons) on Swedish soil. The agreement also frees American soldiers and its armed forces from following Swedish laws etc. The agreement shall come into effect in 2024, if at least two thirds of the Swedish parliament have signed an approval.

Sweden and Finland are to become rising countries before the coming war against Russia, it is announced in the Swedish media! Can Russia see this other than as a great threat?

Swedish politicians and the military leadership loudly declare that we must prepare for war! They try to deceive the Swedish people "with a NATO membership and the DCA agreement with the USA, Sweden will be so much safer", they say! Why should we then prepare for war? The truth is that this rearmament can only mean that the third world war will soon become a fact and that Sweden will be the new battlefield after Ukraine.

The Swedish people want to stop this, who in their right mind wants war?

You are our only hope in this dark situation for Sweden. Our self-determination is about to be sold out. We are turning into a vassal state in the hands of foreign power interests. The decision to be taken by the Hungarian Parliament is the most important decision of this century. It is not only about Sweden's future, but about the future of all of Europe. We want to see a Europe consisting of independent states that respect each other's uniqueness. We want the European community to be built on trade and cultural exchange. Hungary has set an example in this endeavour.

Don't let us down! Say NO to Swedish membership in NATO! You have in your hand the opportunity to stop a probable third world war!

It takes courage to go against the tide of yes-sayers, especially if there is such extensive pressure as in this case, from a large part of the world!

We are convinced that you possess that courage!

Sweden on 31 January 2024
